All orders should be addressed to S. H. JENNINGS, Deep River, Conn. Single copies will be sent, postpaid, to any part of the United States or Canada, on receipt of the price, \$2.00.

❖ INTRODUCTORY. ❖

THE GENERAL PLAN adopted in this volume is entirely ORIGINAL. It covers the ENTIRE FIELD, and interest may be computed on any amount from ONE CENT TO MILLIONS OF DOLLARS, for any length of time, at any rate per cent. In its preparation, the aim has been to combine the utmost degree of SIMPLICITY, CLEARNESS and BREVITY with INFALLIBLE ACCURACY, and to require the least possible effort of the EYES and BRAIN. To perform an excessive number of computations within a limited time, when dependent entirely upon individual accuracy, is exhaustive to the life forces. A feeling of doubt pervades the mind, causing the accountant to often hurriedly review his work. A wearied brain will make and overlook errors almost unconsciously.

That the use of these Tables may result in a large saving of TIME, LABOR and especially of VITALITY, is the sincere wish of
THE AUTHOR.

GENERAL REMARKS.

THE TABLES for finding the *time* between dates are *perfection* for the purpose. The old methods of finding *time* are entirely discarded, but the equivalent of the time in days is given in years, months and days at the head of each table. The names of the months are repeated each time, instead of using dotted lines; thus relieving all effort of the eyes, and preventing the possibility of an error. It very frequently occurs that the *time* on a note or obligation extends from one year into another, but any difficulty in finding the *time* in such cases is entirely obviated by having the tables cover a period of two years.

In finding the *time* on all ordinary notes and obligations, 360 days are counted as a year, and the tables are placed in the first part of the book, pages 8 and 9. It is the custom usually for banks, in finding the *time* on notes at one, two, three and four months, to count 365 days to the year, and tables for that purpose are placed at the close of the book, pages 62 and 63.

In computing the *interest* on such notes, they count 360 days to the year, so that the *interest tables*, which are figured on a basis of 360 days to the year, are correct for every purpose.

The "Instructions with Examples" and "Rules with Examples" occupy pages 10, 11 and 12. The *interest table* for 599 days, from page 52, has been placed at the left side of each of these pages, and the results in all the examples, except the third, on page 10, are obtained from this table. Since the results from every *interest table* are taken in exactly the same way, it follows that familiarity with this table makes one familiar with the entire book.

In using the tables, no effort of the brain is required, as all the calculations have been made, and the results are plainly expressed in dollars, cents and mills. The "dollar" and "cent" columns, denoting principal, are in heavy faced type, and have been repeated four times on each page, so that the eyes need not have to follow long lines.

The *interest tables* cover each day for a period of two years, and are all computed at 6 per cent., except the second and third tables on page 61. From any single table, in connection with the *Rules*, the interest, for the number of days at the head of the table, may be computed at 6 per cent., or any other rate per cent., on any principal sum from one cent to millions of dollars. If these tables were used only to *prove* work done by the old methods, they would be worth many times the cost of the book.

It is confidently asserted that not a single error exists in these tables, and believed that, as a result of their use, the old methods of computing *interest* will soon be abandoned.

It should be remembered that this book, once purchased, will make its owner a complete master of the subject, and be a convenience for a lifetime.

JENNINGS' INTEREST TABLES.

Partial Payments.

A **Partial Payment** is payment in part of a note, bond, or other obligation.

An **Endorsement** is an acknowledgment written on the back of an obligation, stating the time and amount of a partial payment made on the obligation.

UNITED STATES RULE.

I. Find the amount of the given principal to the time of the first payment, and if this payment exceed the interest then due, subtract it from the amount obtained, and treat the remainder as a new principal.

II. But if the interest be greater than any payment, compute the interest on the same principal to a time when the sum of the payments shall equal or exceed the interest due, and subtract the sum of the payments from the amount of the principal; the remainder will form a new principal, with which proceed as before.

EXAMPLE.

\$1000. DEEP RIVER, CONN., May 15, 1890.

Two years after date I promise to pay to S. H. Jennings, or order, one thousand dollars, with interest, for value received. JOHN JONES.

On this note were endorsed the following payments:

Sept. 20, 1891, received.....	\$150.60
Oct. 25, 1893, "	200.90
July 11, 1895, "	75.20
Sept. 20, 1896, "	112.10
Dec. 5, 1897, "	105.

What remained due May 20, 1898?

OPERATION.

Principal on interest from May 15, 1890.....	\$1000
Interest to Sept. 20, 1891, 1 yr. 4 mo. 5 da.....	94.31
Amount.....	\$1094.31
1st Payment, Sept. 20, 1891.....	150.60
Remainder for a new principal.....	\$943.71
Interest from 1st payment to October 25, 1893, 2 yr. 1 mo. 5 da.....	138.54
Amount.....	\$1082.25
2d Payment, Oct. 25, 1893.....	200.90
Remainder for a new principal.....	\$881.35
Interest from 2d payment to Sept. 20, 1896, 2 yr. 10 mo. 25 da.....	179.09
Amount.....	\$1060.44
3d Payment, less than interest due.....	\$75.20
4th "	112.10
	187.30
Remainder for a new principal.....	\$873.14
Interest from 4th payment to Dec. 5, 1897, 1 yr. 2 mo. 15 da.....	73.85
Amount.....	\$946.99
5th Payment, Dec. 5, 1897.....	105.00
Remainder for a new principal.....	\$841.99
Interest from 5th payment to May 20, 1898, 5 mo. 15 da.....	27.01
Balance due May 20, 1898.....	\$869.00

CONNECTICUT RULE.

I. "Compute the interest on the principal to the time of the first payment; if that be one year or more from the time the interest commenced, add it to the principal, and deduct the payment from the sum total. If there be after-payments made, compute the interest on the balance due to the next payment, and then deduct the payment as above; and in like manner, from one payment to another, till all the payments are absorbed; *provided* the time between one payment and another be one year or more."

II. "If any payments be made before one year's interest has accrued, then compute the interest on the principal sum due on the obligation, for one year, add it to the principal, and compute the interest on the sum paid, from the time it was paid up to the end of the year; add it to the sum paid, and deduct that sum from the principal and interest added as above."

III. "If a year extends beyond the time of final settlement, find the amount of the principal remaining unpaid up to the time of settlement, likewise the amount of the endorsements from the time they were paid to the time of settlement, and deduct the sum of these several amounts from the amount of the principal."

"If any payment be made of a less sum than the interest accruing at the time of such payment, no interest is to be computed on this excess of interest, but the interest is to be continued on the principal until the next payment, and so on till the payments exceed the interest."—*Kirby's Reports*.

EXAMPLE.

\$1000. DEEP RIVER, CONN., Feb. 4th, 1894.

For value received, I promise to pay S. H. Jennings, or order, one thousand dollars on demand, with interest at 6 per cent. JOHN JONES.

The following payments were endorsed on this note:

1st payment March 19, 1895, received \$200.
2d " Nov. 19, 1895, " 350.
3d " Sept. 19, 1897, " 15.

How much was due on taking up the note, April 7, 1898?

OPERATION.

Principal.....	\$1000.000
Interest to 1st payment March 19, 1895, 1 yr. 1 mo. 15d.....	67.500
Amount due on note March 19, 1895.....	\$1067.500
1st payment, (to be deducted from amount)	200.000
Balance due March 19, 1895.....	\$867.500
Interest on balance for 1 year, (2d payment being made before 1 year's interest had accrued)	52.050
Amount due March 19, 1896.....	\$919.550
Amount of 2d payment to end of year March 19, 1896, 4 mo.....	357.000
Balance due March 19, 1896.....	\$562.550
Interest on balance to 3d payment Sept. 19, 1897, 1 yr. 6 mo.	50.630
Amount due Sept. 19, 1897.....	\$613.180
3d payment (less than interest then due) deducted.....	15.000
Balance due Sept. 19, 1897.....	\$598.180
Interest continued on former principal to time of settlement, April 7, 1898, 6 mo. 18d.....	18.564
Amount due on taking up the note, April 7, 1898	\$616.744

JENNINGS' INTEREST TABLES.

7

Partial Payments.—Concluded.

A note containing a promise to pay interest *annually* is not considered in law a contract for more than simple interest on the principal. For partial payments on such notes the following is the

VERMONT RULE.

I. Find the amount of the principal from the time interest commenced to the time of settlement.

II. Find the amount of each payment from the time it was made to the time of settlement.

III. Subtract the sum of the amounts of the payments from the amount of the principal; the remainder will be the sum due.

NOTE.—This rule is in quite extensive use among merchants and others.

In New Hampshire interest is allowed on the annual interest if not paid when due, in the nature of damages for its detention; and if payments are made *before* one year's interest has accrued, interest must be allowed on such payments for the balance of the year. Hence the following

NEW HAMPSHIRE RULE.

I. Find the amount of the principal for one year, and deduct from it the amount of each payment of that year, from the time it was made up to the end of the year; the remainder will be a new principal, with which proceed as before.

II. If the settlement occur less than a year from the last annual term of interest, make the last term of interest a part of a year, accordingly.

DISCOUNT.

Discount is an allowance for payment of money before it is due. To find the present worth, divide the amount by the amount of one dollar for the specified time. Deduct this from the principal sum and you have the discount.

BANK DISCOUNT.

It is customary for *Banks* in discounting notes or drafts, to deduct *in advance* the *legal interest* on the given sum from the time it is discounted to the time when it becomes due. Hence,

Bank discount is the same as simple interest paid *in advance*.

According to custom, a note or draft is not presented for collection until *three* days after the time specified for its payment. These three days are called *days of grace*. It is customary to charge interest for them.

In Connecticut and some other states the three days of grace is not now allowed.

After subtracting the discount from the note, the remainder is called the *present worth*, *avails* or *proceeds* of the note.

TABLE,

showing the amount of \$1, or £1, at 3, 4, 5, 6, and 7 per cent. compound interest, for any number of years from 1 to 35.

Years.	3 Per Cent.	4 Per Cent.	5 Per Cent.	6 Per Cent.	7 Per Cent.

INSTRUCTIONS.—If the dates are within the same year, take the numbers from this page, subtracting the number of the earlier date from that of the later, and the difference will be the time in days.

EXAMPLE.—What is the number of days from February 22, 1897, to November 19, 1897, counting 360 days to the year? OPERATION: 319

52

This table and the one on opposite page are to be used in finding the time on all ordinary notes and obligations.

Ans.: 267 days.

JENNINGS' INTEREST TABLES.

Feb.....	15	405	March...	31	451	May.....	15	495	June.....	30	540	Aug.....	15	585	Sept.....	30	630	Nov.....	15	675	Dec.....	31	721

INSTRUCTIONS.—If the dates are within one year and the next succeeding year, take the number for the earlier year from the opposite page, and for the later year from this page.

EXAMPLE.—What is the number of days from February 7, 1897, to October 6, 1898, counting 360 days to the year?

OPERATION: 636

37

If the time between dates extends beyond the second year, then put down the number of full years first, and proceed as before.

Ans.: 599 days.

EXAMPLE.—What is the time in years and days from February 7, 1897, to October 6, 1899? In this case, two years would extend from February 7, 1897, to February 7, 1899, and the number of days from February 7, 1899, to October 6, 1899, would be 276

37

—239 days. Ans.: 2 years and 239 days.

Instructions and Examples.

In using the tables, divide the principal into its component parts, the same as in reading numbers. If we have \$150.80, we read it: one hundred—and fifty dollars—and eighty cents. Then find the interest on the parts from the table, and add them together.

EXAMPLE.—What is the interest on \$150.80 for 599 days at 6%?

OPERATION: The interest on \$100. is \$9.983
 " " " 50. " 4.992
 " " " .80 " .080
 " " " \$150.80 " \$15.055 Ans.

As our object, however, is to save time and labor, and also to make it easy for the eyes, we simply write down the principal, draw a line underneath, and then write the items of interest, keeping the decimal points in the latter under those of the principal, thus: 150.80

EXAMPLE.—What is the interest on \$9,687.45 for 599 days, or 1 year, 7 months, 29 days, at 6%?

OPERATION: 9.687.45
 898.500
 59.900
 7.987
 .699
 .040
 .005
 \$967.131 Ans.

If the time exceeds two years, then take the interest for the number of years from the 6% table, on page 61, and for the days from the regular table.

EXAMPLE.—What is the interest on \$575.80 for 3 years and 125 days at 6%?

OPERATION: 575.80
 From 6% table on page 61,
 From table for 125 days on page 21,
 \$115.640 Ans.

To find the interest on tens of thousands of dollars: take the interest on thousands of dollars and remove the decimal point one place to the right.

EXAMPLE.—What is the interest on \$10,000 for 599 days at 6%? Ans., \$998.33.

To find the interest on hundreds of thousands of dollars: take the interest on thousands of dollars, remove the decimal point two places to the right and repeat the final figure once, remembering if the final figure is 7 that it is to be changed to 6 before repeating.

EXAMPLE.—What is the interest on \$500,000 for 599 days at 6%? Ans., \$49,916.66.

To find the interest on millions of dollars: take the interest on thousands of dollars, remove the decimal point three places to the right and repeat the final figure twice, remembering if the final figure is 7 that it is to be changed to 6 before repeating.

EXAMPLE.—What is the interest on \$8,000,000 for 599 days at 6%? Ans., \$798,666.66.

Rules for Finding Interest at Other Rates Per Cent., with Examples.

To find interest at $1\frac{1}{2}\%$: take the interest at 6% from the tables, and divide it by 4.

EXAMPLE.—What is the interest on \$250 for 599 days at $1\frac{1}{2}\%$?

OPERATION: $\frac{250.}{4}$
 $\frac{19.967}{4.992}$
 $4 \overline{) 24.959}$
 $\$6.239$ Ans.

To find interest at 2% : take the interest at 6% from the tables, and divide it by 3.

EXAMPLE.—What is the interest on \$458.70 for 599 days at 2% ?

OPERATION: $\frac{458.70}{3}$
 $\frac{39.933}{4.992}$
 $\frac{8.985}{.799}$
 $\frac{.070}{3 \overline{) 45.794}}$
 $\$15.264$ Ans.

To find interest at $2\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 6 and subtract, which gives 5% , and divide this by 2.

EXAMPLE.—What is the interest on \$560.90 for 599 days at $2\frac{1}{2}\%$?

OPERATION: $\frac{560.90}{6}$
 $\frac{49.917}{5.990}$
 $\frac{.090}{6 \overline{) 55.997}}$
 $\frac{9.332}{2 \overline{) 46.665}}$
 $\$23.332$ Ans.

To find interest at 3% : take the interest at 6% from the tables, and divide it by 2.

EXAMPLE.—What is the interest on \$65.75 for 599 days at 3% ?

OPERATION: $\frac{65.75}{2}$
 $\frac{5.990}{.499}$
 $\frac{.070}{.005}$
 $\frac{.005}{2 \overline{) 6.564}}$
 $\$3.282$ Ans.

To find interest at $3\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 6 and add, which gives 7% , and divide this by 2.

EXAMPLE.—What is the interest on \$670.40 for 599 days at $3\frac{1}{2}\%$?

OPERATION: $\frac{670.40}{6}$
 $\frac{59.900}{6.988}$
 $\frac{.040}{6 \overline{) 66.928}}$
 $\frac{11.154}{2 \overline{) 78.082}}$
 $\$39.041$ Ans.

To find interest at 4% : take the interest at 6% from the tables; divide it by 3 and subtract.

EXAMPLE.—What is the interest on \$500 for 599 days at 4% ?

OPERATION: $\frac{500.}{3}$
 $\frac{49.917}{16.639}$
 $\frac{.070}{3 \overline{) 49.917}}$
 $\$33.278$ Ans.

To find the interest at $4\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 4 and subtract.

EXAMPLE.—What is the interest on \$380.60 for 599 days at $4\frac{1}{2}\%$?

OPERATION: $\frac{380.60}{4}$
 $\frac{29.950}{7.987}$
 $\frac{.060}{4 \overline{) 37.997}}$
 $\frac{9.499}{\$28.498}$ Ans.

To find the interest at 5% : take the interest at 6% from the tables; divide it by 6 and subtract.

EXAMPLE.—What is the interest on \$6500 for 599 days at 5% ?

OPERATION: $\frac{6500.}{6}$
 $\frac{599.000}{49.917}$
 $\frac{.060}{6 \overline{) 648.917}}$
 $\frac{108.152}{\$540.765}$ Ans.

JENNINGS' INTEREST TABLES.

Rules for Finding Interest at Other Rates Per Cent., with Examples.—Concluded.

To find the interest at $5\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 12 and subtract.

EXAMPLE.—What is the interest on \$80.75 for 599 days at $5\frac{1}{2}\%$?

OPERATION: $\begin{array}{r} 80.75 \\ 7.987 \\ .070 \\ .005 \\ 12 \overline{) 8.062} \\ .671 \\ \hline \$7.391 \end{array}$ Ans.

To find the interest at $6\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 12 and add.

EXAMPLE.—What is the interest on \$724.30 for 599 days at $6\frac{1}{2}\%$?

OPERATION: $\begin{array}{r} 724.30 \\ 69.883 \\ 1.997 \\ .399 \\ .030 \\ 12 \overline{) 72.309} \\ 6.025 \\ \hline \$78.334 \end{array}$ Ans.

To find the interest at 7%: take the interest at 6% from the tables; divide it by 6 and add.

EXAMPLE.—What is the interest on \$87.50 for 599 days at 7%?

OPERATION: $\begin{array}{r} 87.50 \\ 7.987 \\ .699 \\ .050 \\ 6 \overline{) 8.736} \\ 1.456 \\ \hline \$10.192 \end{array}$ Ans.

To find the interest at $7\frac{1}{2}\%$: take the interest at 6% from the tables; divide it by 4 and add.

EXAMPLE.—What is the interest on \$475.80 for 599 days at $7\frac{1}{2}\%$?

OPERATION: $\begin{array}{r} 475.80 \\ 39.933 \\ 6.988 \\ .499 \\ .080 \\ 4 \overline{) 47.500} \\ 11.875 \\ \hline \$59.375 \end{array}$ Ans.

To find the interest at 8%: take the interest at 6% from the tables; divide it by 3 and add.

EXAMPLE.—What is the interest on \$95.60 for 599 days at 8%?

OPERATION: $\begin{array}{r} 95.60 \\ 8.985 \\ .499 \\ .060 \\ 3 \overline{) 9.544} \\ 3.181 \\ \hline \$12.725 \end{array}$ Ans.

UNIVERSAL RULE FOR EVERY RATE PER CENT.

To find the interest at any rate per cent.: take the interest at 6% from the tables, multiply it by the rate per cent. desired and divide the product by 6.

EXAMPLE.—What is the interest on \$95.60 for 599 days at 8%?

OPERATION: $\begin{array}{r} 95.60 \\ 8.985 \\ .499 \\ .060 \\ 9.544 \\ 8 \\ 6 \overline{) 76.352} \\ \hline \$12.725 \end{array}$ Ans.

EXAMPLE.—What is the interest on \$275.80 for 599 days at $2\frac{1}{8}\%$?

OPERATION: $\begin{array}{r} 275.80 \\ 19.967 \\ 6.988 \\ .499 \\ .080 \\ 27.534 \\ 2\frac{1}{8} \\ 3.441 \\ 55.068 \\ 6 \overline{) 58.509} \\ \hline \$9.751 \end{array}$ Ans.

INSTRUCTIONS.—If the dates are within the same year, take the numbers from this page, subtracting the number of the earlier date from that of the later, and the difference will be the time in days.

EXAMPLE.—What is the number of days from March 4, 1897, to December 25, 1897, counting 365 days to the year?

OPERATION: 359

If the 29th of February occurs between the dates, one day should be added.

63

Ans.: 296 days.

This table and the one on opposite page are used principally by bankers in finding the time on notes running one, two, three and four months. They usually compute the interest at the rate of 360 days to the year.

Table for Finding the Time between Dates, counting 365 Days to the Year.

INSTRUCTIONS.—If the dates are within one year and the next succeeding year, take the number for the earlier year from the opposite page, and for the later year from this page.

EXAMPLE.—What is the number of days from September 22, 1897, to January 16, 1898, counting 365 days to the year? OPERATION: 381

If the 29th of February occurs between the dates, one day should be added. 265

To find when a note will become due, add the number of days the note has to run to the number of the date of the note. Ans.: 116 days.

EXAMPLE.—If a note at 60 days is dated April } OPERATION: 100

10, 1897, when will it fall due? { 60

Ans.: 160th day, which is June 9, 1897.

If days of grace are allowed, then 63 should be added, which would make it the 163d day, or June 12, 1897.

MAP OF COTTAGE CITY, MARTHAS VINEYARD.

"Owls' Nest," the Summer Residence of S. H. JENNINGS, is located on Atlantic Avenue, on the crown of the Bluff which extends from Highlands Wharf to East Chop Light.

MARTHAS VINEYARD

is, without doubt, one of the most pleasant and healthful seashore resorts in the world. It includes Cottage City, Edgartown, Vineyard Haven, West Chop and Gay Head. The island is twenty miles long, from east to west, or from Cottage City to Gay Head, and nine miles wide on eastern end from West Chop to Edgartown and South Beach.

Cottage City contains some 1,500 cottages and numerous hotels and boarding houses. Water is supplied by public water works from pure springs located two miles outside of the city. Bathing is fine, temperature of water being about 72°. Sandy beaches, with plenty of water at all times of the tide. Roads are concreted, making them all that those riding in carriages or on bicycles and tricycles could desire.

Four boats each way from New Bedford every week day and one boat each way on Sunday. Fall River Line, from New York, connects at New Bedford with boats for Cottage City. Maine Steamship Line, from New York to Portland, Maine, stops at Cottage City three times a week from each direction.

Interesting religious services held in the various churches and halls every Sabbath.

About 10,000 people spend their summers in Cottage City.

OCEAN PARK, COTTAGE CITY, MASS.

OCEAN PARK, COTTAGE CITY, MASS.

BATHING BEACH, SEA VIEW AVENUE, COTTAGE CITY, MASS.

LAND NEAR EAST CHOP LIGHT, MARTHAS VINEYARD, ON ATLANTIC AVENUE,
OWNED BY S. H. JENNINGS.

S. H. JENNINGS,

Special Agent for The Tinkham Cycle Co.'s Standard TRICYCLES.

Weight, 35 lbs.

These wheels run easier than a bicycle anywhere and especially in climbing hills. No risk of turning over unless you ride too fast around corners. No trouble in keeping up with bicycle riders. Start when you like; stop when you like, and rest or converse with your friends without having to get off.

Price, \$100. Terms: remittance with order. No wheels sold on installment plan.

Address: S. H. JENNINGS, DEEP RIVER, CONN.

SPECIAL NOTICE.

Tricycles made to order for children from seven years of age, up; also for those who can not use their feet; also tricycles for invalids which are propelled by an attendant. Tricycles sustain all your weight, relieve from all nervous tension, and the power required to propel them is so slight as not to be worth mentioning. The legs do not get a particle more exercise than they need. No wheel or motor to be run with electric, gasoline, steam or compressed-air power can be made without being so heavy that it can not be run by foot power.

CAUTION.

Persons who have never ridden on bicycles can ride the tricycle without instruction. Bicycle riders should never attempt to ride the tricycle without some one to hold on to the wheel, and give instruction, as they would run the risk of injuring the wheel and breaking their necks.
